

Forensic Scene Mapping Using Lasers

Course Questionnaire

This course is predominantly a participation class utilizing laser scene mapping equipment owned by you or your employer. To better tailor the course to our students' needs, please complete the following questionnaire. **Up to three (3) students may use the same equipment during the course. Questionnaire must be completed when submitting registration form.**

1. **Will you be bringing your own mapping equipment to the class?**

- Yes (complete questions 2-8) No (please contact IPTM)

2. **Identify the manufacturer of the laser scene mapping equipment:**

- Laser Technology Incorporated (LTI) with Angle Encoder (tripod)
 Laser Technology Incorporated Triangulation (Monopod)
 Laser Atlanta
 Leica
 Nikon
 Sokkia
 Topcon
 Other: _____

3. **How will you be collecting (storing) your data?**

- External Data Collector (Go to question 4)
 Onboard (Go to question 5)

4. **If you are utilizing an external data collector what software will be used?**

This is the data collection software that is installed on the external device. External devices include Recon, Ranger, Archer, Alegro, Pocket PC, etc...

- Pocketzone (by Cad Zone)
 MfX (by Visual Statement)
 Evidence Recorder (by Map Scenes)
 Other: _____

5. **What drawing software program will you import your measured scenes?**

- Crash Zone (CADZone)
 Vista FX (Visual Statement)
 MapScenes
 Autocadd/Autosketch
 Other: _____

6. **Will you be bringing your own laptop computer?** (Not required, but encouraged) Yes No

7. **If yes to question 6, do you have drawing software installed and licensed?** Yes No

(Trial versions of software may be available at the class.)

8. **If yes to question 6, is your computer setup to download from your equipment or data collector?** Yes No

Remember to bring all cables, battery chargers, spare batteries, etc., for your equipment.
