

TABLE OF CONTENTS

Note: Each lesson begins, as does each overview, on a right-hand page having an odd number. Each page of each lesson is followed, inside parentheses, by the number of the lesson it belongs to, and lesson pages are numbered consecutively from one lesson to the next. For example, Lesson 1 ends on page 70(1) and Lesson 2 begins on page 71(2). Each lesson is preceded by an overview of the lesson. Overview pages are numbered in roman i, ii, etc. To distinguish overview page i of Lesson 1 from overview page i of Lesson 2, the number of the lesson will follow inside parentheses, thus i(1) vs. i(2). Overview pages are not counted in the pagination of the lessons. If a lesson ends on an odd-numbered page, it will be followed by a blank page that is counted but has its number suppressed.

	Page
Overview of Lesson 1	1
Lesson Contents	1
Lesson Objectives	2
1 Introduction to Traffic Crash Investigation	4
General	4
Proceeding to the Scene.....	7
Arrival at the Scene	8
Priority Setting	9
Injured Persons	9
Assistance	10
Traffic Control.....	11
Personal Property.....	12
Highway Flares.....	12
Precaution in Use of Flares.....	13
Flare Pattern.....	14
Fires and Hazardous Materials (General).....	18
Hazardous Materials (See DOT Labels).....	19
Hazardous Materials Notification Chart	24
Vehicle Fire Investigation.....	25
The At-Scene Investigation	26
Witnesses and Drivers	27
Hit and Run	29
Hit-and-Run Driver.....	29
Hit-and-Run Vehicle.....	31

Hit-and-Run Victim	34
Hit-and-Run Follow-Up Investigation.....	34
Crash Related Considerations	35
Vehicle Inspection	35
Crash Causes.....	36
Enforcement.....	36
Before Leaving the Scene.....	38
Follow-Up Investigation	38
A Guide to Traffic Crash Definitions, Types and Classifications.....	39
Crashes.....	39
Crash	39
Harmful Event.....	39
Cataclysm	39
Unstabilized Situation	40
Stabilized Situation	40
Persons	40
Driver	40
Occupant.....	40
Passenger.....	40
Pedestrian	40
Traffic Unit.....	40
Vehicles.....	41
Motor Vehicle	41
Motorcycle.....	41
Road Vehicle	41
Other Road Vehicle	41
Land Vehicle.....	41
Trafficway	41
Bikeway.....	41
Bicycle Lane.....	41
Bicycle Trail.....	42
Channelized Intersections.....	42
Collector-Distributor Road.....	42
County Road	42
Crosswalk.....	42
Curve Return.....	42
Driveway Access	42
Frontage Road	43
Intersection.....	43
Interstate Highway.....	43
Interstate System.....	43

Junction.....	43
Fully Controlled Access Highway	43
Gore	43
Grade Separation	44
Highway	44
Interchange	44
Landway.....	44
Local Street.....	44
Other U.S. Route Highway.....	44
Other State Route Numbered Highway	44
Private Way.....	45
Ramp.....	45
Road	45
Roadway	45
Shared Road	45
Shoulder.....	45
Trafficway.....	45
Transport Way.....	45
Vehicle Incidents and Crashes.....	48
First Harmful Event.....	48
Categories.....	48
Types of Road Vehicle Incidents/Crashes.....	49
Motor Vehicle Incident/Crash Classification by Type.....	50
Incident/Crash Classification by Number of Vehicles.....	50
Incident/Crash Classification by Severity.....	51
Definitions in Respect to Damage	51
Incident/Crash Classification by Land-Use Character.....	51
Incident/Crash Classification by Political Jurisdiction.....	52
Incident/Crash Classification by Administrative Class of Trafficway.....	52
Definitions in Respect to Injury.....	52
Classifications Based on Injury	52
Traffic Crash Investigator's Inventory	54
Overview of Lesson 2	59
Lesson Contents	59
Lesson Objectives.....	59
2 Traffic Crash Series of Events.....	60
Traffic Crash Defined.....	60
Series of Events Defined	60
On-Scene Series of Events.....	61

Series of Events Projects	68
Instructions	68
Project Code Letters	69
Series of Events Project Example	71
Overlining Projects – Overline Using Code Letters	74
Overview of Lesson 3	87
Lesson Contents	87
Lesson Objectives	88
3 The Human Element	89
Human Characteristics	89
Driver Characteristics Affecting Ability to Drive Safely	89
Pedestrian Characteristics Affecting Ability to Avoid Being Struck	93
Perception and Reaction	94
Impaired Driving (DUI, DWI) and Tests for Impairment	96
Psychophysical Observations Checksheet	100
Interviews and Statements	102
Driver, Passenger and Witness Information to Be Obtained	103
Injuries and Their Causes	104
Diagrams and Descriptive Material	105
The Human Skeleton	106
Injury Descriptions	107
Vehicle Interior	109
Indications of Occupant Contact	110
Indications of Ejection	111
Soft Tissue and Skeletal Injuries	112
Lesson 3 Projects	113
Project A-1	113
Project A-2	115
Project A-3	119
Overview of Lesson 4	121
Lesson Contents	121
Lesson Objectives	122
4 Environmental and Trafficway Factors	123
Factors	123
Environmental Factors	123
Roadway Factor	123
Informational Factors	124

Operational Traffic Control Factors.....	125
At-Scene Evidence	125
Traffic and Highway Engineering.....	126
Factors in Traffic Engineering and Highway Design.....	128
Roadway.....	129
Obstructions	131
Weather and Light.....	134
Glare	134
Trafficway Marks and Evidence.....	136
Damage to Fixed Objects.....	136
Roadway Marks and Damages.....	138
Debris	143
Tire Marks.....	146
Skid Marks and Scrub Marks.....	160
Tire Action	173
Scuff Marks or Sideslip Marks	177
Lesson 4 Projects	185
Project A-1	185
Project A-2.....	187
Project A-3.....	189
Project A-4	191
Project A-5	193
Overview of Lesson 5	195
Lesson Contents	195
Lesson Objectives.....	196
5 Vehicle Inspections	197
General Procedures.....	197
Crash Vehicle Items to Be Related to Condition and Position	198
Accelerator	199
Brakes	201
Types of Brakes	201
Dual Braking System.....	203
Anti-Lock Brakes	204
Parking Brake.....	205
Power-Assisted Brakes	206
Badly Adjusted Brakes	207
Brake Inspections.....	207
Air Brake System.....	208
Brake Equipment Faults (Chart)	209

Steering Systems.....	211
General	211
Steering Gear Design	213
Front Wheel Drive (FWD)	217
Trouble Shooting Chart (Steering)	218
Quick Checks (Front Suspension)	219
Suspension Systems.....	220
Independent Front Wheel Suspension	222
Independent Rear Wheel Suspension.....	223
Leaf Springs.....	224
Trailing Arm (Link).....	226
Coil Springs.....	226
Torsion Bars.....	227
Air Suspension	227
Shock Absorbers.....	228
Tires and Tire Types	229
Bias-Ply Construction	229
Radial-Ply Construction.....	230
Inspection of Tires.....	231
Exhaust System.....	237
Other Parts Critical to the Investigation	239
Trailer Connections	239
Gearshift Lever.....	240
Glass	240
Horn.....	242
Lamps and Reflectors.....	243
Windshield Wipers and Defrosters.....	244
Radio, Cassette Player, CD Player, DVD Player	245
Cell Phone and GPS Device.....	245
Mirrors	246
Speedometer.....	247
Occupant Protection Systems	248
Seat Belts	248
Air Bags	249
Interior of the Vehicle.....	251
Door Locks.....	251
Loads	252
Vehicle Fires.....	253
Vehicle Damage	255
Contact Damage	255
Induced Damage.....	256

Imprints	256
Ruboff	256
Direction of Force	257
Damage Classification	257
Mechanical Inspection Guide	259
Checklist of Physical Evidence	264
Glossary (Automotive)	266
Lesson 5 Projects	271
Project A-1	271
Project A-2	272
Project A-3	273
Project A-4	275
Overview of Lesson 6	277
Lesson Contents	277
Lesson Objectives	278
6 Speed Estimates	280
General Information	280
Symbols and their definitions	283
Table 6-1 Formula Summary	285
Speed and Velocity Conversions	289
Speedometer Accuracy Tests	290
Skid Mark Measurements	291
Coefficient of Friction and Drag Factor	296
Test Skids	303
Procedures for Conducting Test Skids	303
Adjustment to Friction Values	307
Construction and Use of Drag Sleds	312
Table 6-2 Possible Coefficients of Friction	319
Continuous Skid on Different Surfaces	320
Table 6-3 Braking Percentages for Vehicles	323
Combined Speeds	324
Distance	326
Time	327
Constant/Average Velocity Formulas	328
Curve Speeds	332
Lesson 6 Projects	348
Project A-1	348
Project A-2	350
Project A-3	353

Project A-4	354
Project A-5	355
Project A-6	356
Project A-7	357
Project A-8	358
Project A-9	359
Project A-10	360
Project A-11	361
Overview of Lesson 7	363
Lesson Contents	363
Lesson Objectives	364
7, Part 1, IPTM Traffic Template (US)	365
Part 1 Projects	365
Project A-1	365
Project A-2	375
Project A-3	376
Project A-4	377
Project A-5	378
Project A-6	379
7, Part 2, IPTM Metric Traffic Template (SI)	381
Part 2 Projects	381
Project M-1	381
Project M-2	390
Project M-3	391
Project M-4	392
Project M-5	392
Project M-6	394
Overview of Lesson 8	397
Lesson Contents	397
Lesson Objectives	398
8 Field Measurements and Scale Diagrams	399
Purpose of Measurements	399
What to Measure	400
Scale Diagrams	405
Evidence	407

Field Sketches.....	409
Preparing a Field Sketch	410
Contents of a Field Sketch.....	413
Reference Points.....	414
Methods of Taking and Recording Measurements	418
Conventions for Recording Measurements	422
Coordinate Measuring Method and the Baseline.....	423
Measurement Table.....	425
Legend	426
Triangulation Measuring Method.....	429
Preparing a Scale Diagram.....	434
Grade and Superelevation.....	437
Curves	439
Angles at Intersections	444
Offset Streets	447
Inaccessible Areas	449
Measurement Records	450
Overview of Lesson 9	453
Lesson Contents	453
Lesson Objectives	454
9 Crash Photography and Video Recording	455
Introduction	455
Credibility of Photographic Evidence	455
Who Should Take Crash Photographs.....	457
When to Take Crash Photographs.....	458
What to Photograph at a Crash Scene.....	459
Planning the Photographs at a Crash Scene	461
Photographic Equipment	462
Techniques in Photographing a Crash Scene	468
Identification of Photographs	470
Video Recording of a Crash Scene.....	471
Glossary of Terms for Photography	474
Photographs to be Taken of Case Vehicle by Field Investigator.....	481
Exposure Control and Guidelines	482
Guidelines for Selecting the f-Number	483
Guidelines for Selecting the Shutter Speed.....	484
Bibliography	485
Index	489
