TABLE OF CONTENTS

CHAPTER		PAGE
I	**INTRODUCTION TO MOTORCYCLES**	**1**
	An overview of motorcycling and the serious nature of motorcycle accidents.	
II	**TYPES AND OPERATION OF MOTORCYCLES**	**7**
	Descriptive data about the various types of motorcycles, their basic operation including major controls and engine designs.	
	TYPES OF MOTORCYCLES	7
	OPERATIONAL DESIGN OF ENGINE	13
	TRANSMISSION	18
	BRAKES	20
	DRIVETRAIN	21
	CONTROLS	22
III	**EXAMINATION OF THE MOTORCYCLE**	**27**
	Identification data, in-depth examination of major controls, wheels, tires, brakes and drivetrain. Damage analysis of the motorcycle, including photography.	
	DESCRIPTIVE DATA	27
	MAJOR MECHANICAL COMPONENTS	31
	DAMAGE ANALYSIS	81
	MATCHING VEHICLE DAMAGES TO OBJECTS	91
	EXAMPLE CASE OF MOTORCYCLE INSPECTION	92
	MOTORCYCLE INSPECTION FORM	96

IV ACCIDENT SCENE DATA 97

Detailed analysis of physical evidence found on the highway surface including skidmarks, scrapes, scratches and gouges. Visibility and hazards experienced by the motorcyclist.

VISIBILITY 97
TIRE MARKS 99
MARKS ON THE HIGHWAY 99
DEBRIS 106
FLUIDS 107
POINT OF IMPACT 109
POST-ACCIDENT POSITION 109
MISCELLANEOUS HAZARDS 110

V OPERATOR INFORMATION 113

Accident factors, safety and training of the motorcyclists. Myths and truths about the operation of a motorcycle. Injury patterns.

ACCIDENT FACTORS 113
SAFETY AND TRAINING 115
MYTHS AND THEIR DANGER 115
A FEW INVESTIGATIVE TIPS 118
INJURY PATTERNS 119

VI HELMETS AND OTHER EQUIPMENT 121

Descriptive data of the various types of helmet construction and helmet styles, protective eye equipment, and clothing.

THE HUMAN BRAIN AND ITS COVERINGS 121
SAFETY HELMETS 125
EYE PROTECTION 136
CLOTHING 137

VII MOTORCYCLE DYNAMICS 139

Operational considerations, friction, turning, acceleration, braking, speed analysis, time and distance calculations. Mathematical equations.

FRICTION REVIEW 139
MOTORCYCLE DYNAMICS 140
RAKE AND TRAIL 141
TURNING 145
GYROSCOPIC PRECESSION 152
OBSTACLE AVOIDANCE 155
CONVERSION FACTORS 158
CURVE ANALYSIS 158
EQUATIONS 159
DETERMINING SPEED FROM ENGINE RPM VALUES 170
EXAMPLE OF USE OF GEAR RATIO TO DETERMINE SPEED 179
SPEED FROM COLLISION DAMAGES 184
VARIOUS MOTORCYCLE FRICTION TESTS 190
VAULTS AND FALLS 195
ACCELERATION 204
BRAKING 220
TIME 237
DISTANCE 240

APPENDICES

A HURT MOTORCYCLE STUDY 243

A summary of the most comprehensive accident study conducted to date. Includes information about the operator, the motorcycle, safety equipment, the collision and injury factor.

B STATE MOTORCYCLE LAWS 249

A summary chart of current state laws regarding the operation and licensing of motorcycles.

Copyright

C MOTORCYCLE, HELMET AND TIRE MANUFACTURER INFORMATION **253**

A list of major motorcycle, helmet and tire manufacturers in the United States including addresses and telephone numbers.

D GLOSSARY **259**

Terms and abbreviations used in the motorcycle industry.

E MOTORCYCLE SPECIFICATIONS **269**

A comprehensive list of motorcycles by manufacturer containing specifications and dimensions for use by accident investigators.
