

TABLE OF CONTENTS

Chapter		Page
1	Introduction to Tire Markings	1
2	Tire Construction and Manufacturing Methods	7
3	How a Tire Works	21
4	Basic Examination Techniques	39
5	Tire Photography	47
6	Penetrations and Punctures	59
7	Impacts	69
8	Fatigue or Casing Break Up	77
9	Cuts, Scores and Abrasions	85
10	Adhesion Defects	93
11	Tread and Belt Separations	103
12	Broken Beads	119
13	Inner Tubes – Manufacturing Methods and Problems	125
14	Valves	141
15	Wheels	147
16	Flaps and Rim Bands	165
17	Recaps, Retreads and Recuts – Manufacturing Methods and Problems	169

18	Tire Fires	183
19	Explosions and Bursts	187
20	Non-destructive Examination Techniques	199
21	Tire Sectioning and Sampling	207
22	Tire and Vehicle Interaction	213
23	On Two Wheels	223
24	Automobile Problems	229
25	Truck Problems	233
26	Aircraft	239
27	Repairs	245
	Appendix 1a – Load and Speed Codes (European ECE Reg 30)	253
	Appendix 1b – Temperature, Treadwear and Traction Codes (Federal Regulation 49 575.104)	254
	Appendix 1c – ECE Type Approval Codes	255
	Appendix 2 – Tire Investigation Form	258
	Car Tire Markings Chart	262
	Index	264
